- * Vs Low: 4.6p 1.6 > p => p > 0.44
- * Vs Medium: 4.6p 1.6 > 2p 0.5 => p > 0.42
- * Vs High: 4.6p 1.6 > 4p 2 => p > -0.67 (always true)
- * This option is always better than High. It will replace High as the optimal choice for some confidence levels.

Conclusion:

Options c. (1.8, -1.0) and d. (2.0, -1.0) are the only options that are optimal for some range of confidence levels without completely replacing any of the existing options.

Therefore, the answers are **c** and **d**.

△ ♀ ≪ :

Give a number between 1-3 for your confidence in the previous answer. The confidence letter will change the marking on the question....

- 2.0 Experimental Advanced. Lacks access to real-time info and some Gemini features.
- 3, High
